

Digital Library

Monitoring Thousands of Companies and 42 New Markets

Ideal for Business, Education and Government Use

Computer Review Digital Library is a collection of powerful interactive databases about technology. They are updated continually to show you what is happening in the digital economy by company, technology, and country. Smart bots monitor companies daily to identify markets, competitors, executives, products, jobs, and more.

It's easy to spot opportunities when you have well-organized information from thousands of companies in 120 countries at your disposal. These original sources make market research and sales prospecting easier and more reliable for you.

We help you find companies and technology solutions for Business, Marketing, Finance, Engineering, Manufacturing, and Research. You can track the latest developments in Mobile Technology, Robots, Satellites, Biotech, Stem Cells, Drones, 3D Printing, Bitcoins, Crowd Sourcing, and much more.

A powerful and user-friendly online Selection Chart guides you to the right information. It allows you to confidently monitor the Knowledge Economy for business and personal use.

Vast Amounts of Organized Information Updated Daily

Smart bots monitor thousands of companies in over 120 countries daily to identify new markets, competitors, execs, jobs, technology, business trends and global reach.
