

"New Technology Markets Worldwide."

News Release 2023

Gloucester, MA
January 1, 2023
6 minutes read

This new year, we are introducing The Complete Digital Economy. This professional technology service monitors technology markets worldwide to meet your most demanding requirements. You can track technology and research daily at 40 sectors of the Digital Economy in 150 countries.

We are writing to inform you of this extraordinary and exciting opportunity to engage our technological product at a very affordable price.

What is The Complete Digital Economy?

The Complete Digital Economy is a global database of real-time activity forging new technology companies, markets, and products. An interactive 1000-page directory and individual 40 market reviews provide a comprehensive view of the digital economy. You can examine the daily developments of companies and research in key technology sectors as it unfolds, for a full view of "The Complete Digital Economy".

Thanks to the digital economy, businesses are rapidly adjusting and adopting new methods. Professionals and students need to analyze the markets and the best alternatives available to them. This is a time-intensive process and requires special effort which we provide for you.

Why You Need The Complete Digital Economy?

To benefit the academic, public, and private sectors, Computer Review Digital Library maintains a comprehensive technology database. We track technology companies and record their activity to save you time and help you discover new opportunities. Whether at work or in school, you benefit from the real-time information at your disposal.

The proprietary ActiveTrak System is designed with your requirements in mind. We track technology companies to save you time, identify options, and take advantage of opportunities. Whether at work or in school, you benefit from the real-time information at your disposal.

You will enjoy the new technology database monitoring 150 countries daily. You can easily analyze the activity of 40 technology sectors in each country. You can explore the complete

digital economy, or any part, from original sources that make sense. Well-organized charts show a wealth of real-time information for quick access and retrieval.

With such a large number of companies involved, a unified directory would be a great advantage to analyze technology markets. Yes, we're talking about a global hi-tech database helping you to navigate the complete digital economy at once, hence saving much time and effort.

Corporate and college libraries that serve professionals and students need a top information source for the new digital economy. With our technology, you can easily explore the market's many opportunities in detail and in minutes. Staying up-to-date and competitive is simple, thanks to daily updates from verified original sources.

Now you can access this ever-evolving information right on your computer. You can access the entire database at any time for one year when you subscribe to our digital library. This includes daily updates to all market sectors and new market reviews as they are announced. Thanks to the automated ActiveTrak system, users can review daily developments by sector in minutes rather than in hours.

The Market Reviews directly show how each company in the database relates to the digital economy. Universities and schools that are teaching their students about technology can also point to daily career paths offered in new industries. Libraries, our repositories of knowledge, want to offer students the most up-to-date information to guide their decisions toward a fulfilling and financially secure career. From tech marketing to production and design, the students need to know what companies are hiring and which can best advance their lives through technology. No matter what country your students come from, they can see at-a-glance the activity in their country and in the whole world.

The database is used by business analysts, advertisers, consultants, and market experts to review developments and find workable solutions for thorny issues. They can quickly locate new sources, people, research, and much more. A vast amount of information is organized and kept up to date by over 200 interlinking software applications. Because we want you to have access to our service, we offer you a special Library rate for the complete digital economy. When you take advantage of our low rate, you receive a 1000-page technology chart for free unlimited distribution, a gift everyone will enjoy.

Along with the free chart comes a directory relating the companies to specific sectors. This real-time directory is also updated regularly to reflect the companies and their operational goals. Our ActiveTrak system works hard around the clock to check and update facts as companies make changes online. We can also customize your Free Chart with the library, university, or brand name, such that it becomes, in part, proprietary to your institution. ActiveTrak has been operational and growing for over twenty years, a testament to its efficacy and benefits.

FREE 1000-page Tech-Chart for Libraries

Here is a 1000-page real-time technology chart providing valuable information about thousands of companies in 40 technology sectors and 150 countries. You see when the company was established, which sector and country it belongs to, and which Technology Market Review provides daily in-depth information about similar companies and solutions.
